

**A. IN THE SPECIFICATION:**

At Page 34, please amend the following two paragraphs as indicated hereinafter:

Common forms of computer-readable media include, for example, a floppy disk, a flexible disk, hard disk, magnetic tape, or any other magnetic medium, a CD-ROM, any other optical medium, punch cards, a RAM, a PROM, and EPROM, a FLASH-EPROM, any other memory chip or game cartridge with ~~memory~~memory.

Various forms of computer readable media may be involved in providing one or more sequences of one or more instructions to processor 404 for execution. For example, the instructions may initially be stored on a magnetic disk of a remote computer. The remote computer can load the instructions into its dynamic memory and send the instructions over a telephone line using a modem. A modem local to computer system 400 can receive the data on the telephone ~~line~~line. Bus 402 provides the data to main memory 406, from which processor 404 retrieves and executes the instructions. The instructions received by main memory 406 may optionally be stored on storage device 410 either before or after execution by processor 404.
